# International Symposium on Monolingual and Bilingual Speech 2022

**Early mixing in a Spanish-English early simultaneous bilingual in a Japanese context at age 2;4**

Rebekka Eckhaus  
International Christian University, Japan /  
University of the Basque Country, Spain  
reckhaus@icu.ac.jp

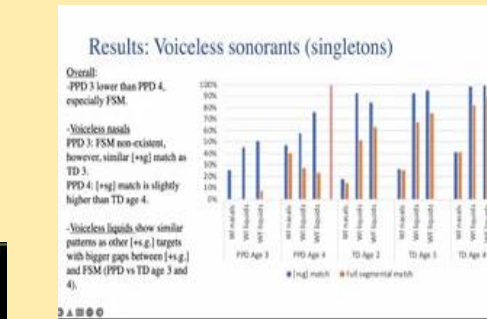

**Participants**

27 Wayunaiki / Guajiro Spanish bilinguals  
13 intermediate and 14 advanced

The bilingual speakers were recruited in the town of Dribisa, Department of La Guajira Colombia. Dribisa is mainly a Wayunaiki speaking town.

The monolingual speakers were recruited in the city of Maicao, Department of la Guajira. This city is Spanish speaking dominant.

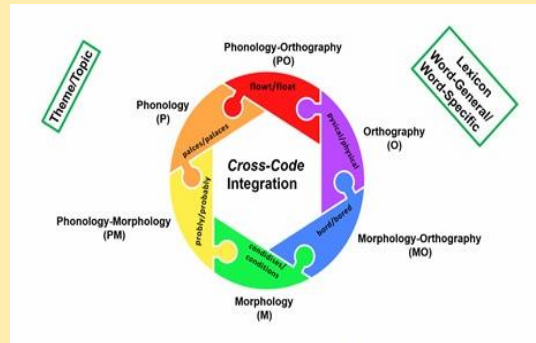

**Research questions**

- Does reduplication help referent retention in novel words?
  - Mandarin reduplicative form
    - CW e.g., bai-bai (nonword)
    - OW e.g., yi-yi (nonword)
  - OW arbitrariness
    - Arbitrary e.g., OW +  $\Delta$  (match)
    - Non-arbitrary e.g., OW +  $\Delta$  (mismatch)
- Does iconicity in onomatopoeia boost novel verb learning?

**TRUTHFULNESS OF SPEAKER INVESTIGATING THE ACCENT FAMI**

Mateja Pavlic and Brode  
08 April 2022

**Speaking two languages changes the brain**

**\*DEMENTIA DELAY**  
- Age of Acquisition  
- Proficiency and Dominance  
- Language Similarity  
- Type of Processing

**Methodology**

**Participants**

- 23 French-Arabic bilingual participants from Greater Montreal.
- Main ages 4.5 year-olds.
- They had exposure to French and Arabic by 18 months of age, and were exposed to a minimum of 20% input for each language.

**Tasks**

- French and Arabic Picture-Naming Tasks;
- French and Arabic Non-Word Repetition Tasks;
- French and Arabic Receptive Vocabulary Tasks;
- French and Arabic Expressive Vocabulary Tasks;
- The Canadian Questionnaire of Use and Exposure in Bilinguals (MacLeod, 2012).

**Measures**

- Percentage of correct consonants for phonological tasks;
- Raw score for Vocabulary tasks;
- Percentage of exposure.

**Danish**

Germanic language of the North Germanic branch

SDU

**Subject Pronoun expression among Bubi-Spanish speakers in Equatorial Guinea.**

Lilia Padilla  
Assistant Professor of Spanish  
Department of World Languages and Cultures  
San Houston State University, Texas

**Terminology:**

- Age of Acquisition (AOA):** the age of first meaningful exposure and interaction in the target language, as all participants are lifelong inhabitants of Montreal, Quebec

**Testing the relationship**

There is clearly a tendency or relationship between preclitics and VO, and enclitics and OV

**What can we learn from any possible results?**

- Hypotheses with respect to the hierarchy can be made with respect to monolingual and bilingual with the various combinations
- Certainly, coordination is not the only thing that has prosodic attachment, what else is attached prosodically, and how strong are these tendencies with respect to word order?
- What does this say about headedness? Markedness?
- What does this say about information structure with respect to word order?

WHEN FEED EATS FOOD GETS FIBDOWN  
THE OLD MAN THE BOAT
